EduMatch AI: Placement Rules (Demo, 2026)

Rule version: rw-demo-policy-2026-v1 - Cohort: RW-2026-S3-DEMO - 320 applicants, 27 school offers

Demo policy only. Not an official NESA rule. Student names and marks are synthetic.

1. Priority

Applicants are processed by overall score (highest first). Equal scores: lower student ID first.

2. Ranked choices

Each applicant lists up to 3 school combinations in order. The first listed choice that the applicant qualifies for AND that still has a free seat is proposed.

3. Entry requirements

Overall score must reach the school cutoff (min_overall). Some combinations also set a minimum mathematics, science or language score.

4. Capacity

A combination never receives more students than its seats (draft + approved).

5. AI-suggested alternative (fallback)

Only if no listed choice works AND the applicant allowed alternatives (allow_fallback = true):

the local AI model ranks eligible schools with free seats by subject fit and home province;

the best one is proposed. The score is a compatibility score (0-100), not a probability.

6. Human approval

Every proposal is a draft. An officer approves, changes (with a reason) or rejects it.

Only approved placements are exported. Every decision is recorded in the audit log.

School offers in this cohort

LDK-PCM	Lycée de Kigali (PCM)	Nyarugenge	seats	8	cutoff 74
LDK-MEG	Lycée de Kigali (MEG)	Nyarugenge	seats	12	cutoff 76
LDK-HEG	Lycée de Kigali (HEG)	Nyarugenge	seats	8	cutoff 73
CSA-PCB	Collège Saint André (PCB)	Nyarugenge	seats	14	cutoff 64
